

Hi there! Nice to meet you.

I'm Sammy, Surface & Air. I'm here to tell you about an exciting new addition to our community that is creating a healthier and safer environment for all!

Healthy buildings mean healthier residents, staff and overall community.

You may notice some new 'light' fixtures around the community. These fixtures are working around the clock, providing the best-in-class **UV-C disinfection technology** that safely and continually disinfects air and surfaces, even in occupied spaces.

This technology is silent and harmless to humans, but deadly to harmful microorganisms such as bacteria, viruses, mold, and mildew.

This technology will reduce outbreak risk as well as provide on-going peace of mind to our staff, our residents, and our families.

If you have any questions, please feel free to reach out at any time!
